

Cushioned by tranquil grounds in a quiet residential area, blast furnace is only 5 minutes away from the vibrant city centre of Derry.

The studio comprises a large custom designed recording area, with temporary fixtures and fittings that can be used to remodel the acoustic preference, plus several smaller rooms with varying acoustics. Video dubbing and foley work are also completed in-house, with the support of session musicians and specialist producers also provided.

The facility offers ADAT digital recording with 32 track Protools/Logic editing/mixing system. A relaxed atmosphere and experienced engineers will make your recording session a pleasure. There is also the convenience of a ramp for easy loading and wheelchair access. Ample parking space is also provided.

All types of recording are catered for, from voice-overs to singer song-writers, from rock bands to choirs. We are specialists in programming for dance music and digital editing. We provide post-production for film & TV with an AV dubbing facility in-house incorporating full Dolby Surround mixing capabilities. This also includes foleying and special FX sound design. We have a wide range of support services including session musicians and specialist producers/mixing engineers.
